

## BEDBUG TREATMENT PREP LIST

### BEFORE THE TREATMENT

- ★ People and pets must vacate the premises.
- ★ Turn off the AC and all air moving devices (fans, air purifiers, humidifiers, dehumidifiers).
- ★ Place medical breathing equipment in air tight containers.
- ★ Seal exposed food or ingestible liquids in air tight containers.
- ★ Put toothbrushes and contacts away.
- ★ Empty all dressers and contents of cabinets. Pull the drawers out of the dressers and place them on the floor.
- ★ Put all clothing, blankets and other linens in plastic bags or totes and place them in garage or hot outdoor area if possible.
- ★ Remove all bedding and linens from beds and other covered furniture.
- ★ Run all bedding, linens, and furniture covers in the dryer for 30 minutes on HIGH heat.
- ★ Remove all outlet and light switch covers.

### AFTER THE TREATMENT

- ★ Sweep all hard surface floors.
- ★ Vacuum all carpeted areas, beds, and furniture—especially if a cover will be going back on it—twice a day for 1 week.
- ★ IMPORTANT: Do not reintroduce untreated clothing or other items.
